Description

The Ryme Wireless Heavy Duty Column Lift – 34 Tonne is a powerful 4-column mobile lifting system designed for heavy commercial vehicles. Powered by rechargeable batteries and a 24V DC hydraulic motor, it operates completely wirelessly for maximum mobility and safety. The 7" touchscreen display shows lift height, battery level, and system status, while large glove-friendly controls make operation simple and efficient.

Built with advanced synchronization technology, the lift ensures smooth, level raising and lowering, automatically stopping at 1700mm or if column height variance exceeds 50mm. Each column features a mechanical safety lock and emergency stop. The system includes a trailer lifting mode, can be expanded with additional column pairs for increased capacity, and is CE certified with an IP54 rating for durability.

Technical data and Dimensions

Load Capacity	8500 kg Per Column
Max Lifting Height	1700 mm
Fork Length	380 mm
Lifting Time	120 sec
Fork Width	240 - 624 mm
Motor Power	2.2 kW
Battery Charger	240V Single Phase
Unit Weight	810kg Per Column
Column Dimensions	(L)1384 x (W)1145 x (H)2465 mm
